BAYARD TAYLOR'S BOOKS.

About 800 Volumes Sold by Auction—Very Low Prices Obtained.

A red flag hung over the door of Bangs & Co.'s establishment, 739 Broadway, yesterday afternoon, and printed notices inside said that the library of the late Bayard Taylor was to be sold at public auction. On a large table in a room on the second floor the entire collection of books was arranged, and the buyers were at work for some time before the sale began.

The more valuable works were, as a rule, old, and in a bad state of preservation, while many of those that brought small prices—and this was especially noticeable in the case of the "presentation volumes"—had not been even examined for the leaves were still intact.

When the lot began at 2 o'clock, there were probably about a hundred persons present. Many of these were well-known book-sellers.

The bidding was anything but brisk at the start, and even as the sale progressed it was difficult to get a reasonable offer for any book. Lot 10 was the first to be sold, and it was paid for a single work. Then the catalogue showed volumes 6, 7, and 8 of the "American Oriental Society Journal," for which \$2.70 was paid.

Immediately thereafter a beautiful little book, "The History of the United States," was sold for 20 cents, and with but little more in the price, the sale continued until 10 o'clock.
